Hollis Center, ME

EAGLE INDUSTRIES, INC.

Story written and provided by Lars Sjulander

Eagle Industries, Inc. provides customers with the finest metal stamping and precision sheet metal components and assemblies in New England and beyond. Started back in 1973 in Sanford, Maine, Nils Sjulander and two partners focused on on metal and plastic stampings. The business flourished because customers saw and recognized the quality product that was being produced.

Over time, they expanded their manufacturing capabilities which broadened their value-added services to their customers. In 1986 they built a new facility in Hollis Center, Maine.

This 27,000 square foot facility has evolved over 32 years, now not only running Minster punch presses but a full range of processing equipment. This includes turret presses, fiber lasers and spot-welding machines, providing Eagle the luxury to manufacture a wide array of sheet metal components for their clients. Eagle Industries is now being managed by Jon Sjulander, Nils' son, and Lars Sjulander, Jon's son.

This new Prima Platino fiber laser machine offers Eagle's customers shorter lead times, with zero tooling expenses.

Prima Cutting Capabilities

Aluminum	.020" to .187"
Stainless and Mild Steel	.020" to .375"
Brass and Copper	.020" to .250"

Like many small family-owned and operated businesses they didn't inherit their positions, they worked on the shop floor and learned the trade first before moving up into management roles. Given their history and knowledge of the trade from the floor to the supervisor desk, they have the

Along with laser, EDM, stamping punch presses, and turret presses, like the one above, they can boast on the best flock of precision focused employees in the industry. They take great pride on the expert quality performance of their staff.

This stainless steel formed part is just a small sample of parts Eagle workers were able to produce in high precision.

luxury of being able to cover any missing employee's work station and have built a respect with their employees and clients for working their way up the company and being familiar with all aspects of the business.

Customer needs are paramount. Eagle takes great pride in offering precision sheet metal fabrications and components without ever sacrificing quality or customer service. They start with prototyping, laser cutting, wire EDM and

forming to in-house tool design resulting in high volume stamping when necessary. This process can continue right through to final assembly and kitting per customer requirements. Whether it is one or one million parts, Eagle's flexibility accommodates all its customers' requests.

With 47 years of experience and expertise, Eagle Industries continues the production of small metal enclosures, electronic chassis and countless other flat or formed precision sheet metal parts accurately and on time. They offer competitive Northern New England prices, from prototype to production volume for all your sheet metal fabrication and metal formed requirements. With their in-house engineering and maximum efficiencies, Eagle Industries can provide complete value-added sheet metal fabrication and assemblies and meet the needs and expectations of their clients.

With a wide range of assembly services, Eagle Industries can offer custom options and a level of customer satisfaction that has put their business at the forefront of the industry for sheet metal

Precision, tight tolerance parts, like these, are just part of their normal day.

fabrication and assemblies. All their finishing and assembly work - including hardware insertion, welding and spot welding is done with the same attention to detail, follow-through and efficiency that they apply to all of their manufactured products.

Safety and cleanliness are paramount at Eagle Industries. The company boasts an impressive mark of having over 10 ½ years without a lost time injury. Their yearly safety training requirements, quarterly safety reports and daily stretching exercises help ensure employees work safely, comfortably and efficiently; resulting in increased productivity, on time delivery and general employee satisfaction. Retention is rarely an issue at the family run business, as many of Eagle's employees have remained with the company over 15 years and even one employee recently celebrated 43 years with the company. Eagle is a true 'family' business, instilling the values of a small

business with New England work ethic and quality craftsmanship.

Eagle Industries' ISO 9001-2015 registered facility provides customers with components from initial design to prototypes with low volume and high volume production all without ever leaving their facility.

They also offer Just In Time (JIT), reverse engineering, rapid prototyping and KANBAN services. In 2017, Eagle was awarded the Supplier of the Year award for quality from a Fortune 1000 company.

As they move toward their second half century in business, Eagle Industries is committed to the future. The acquisition of state-of-the-art equipment allows them to better meet the needs of their ever-expanding customer base. Recent equipment updates include a new Amada turret press, 4000-watt Prima fiber laser and a Virtek Laser QC Vision System for inspection or reverse engineering of parts.

Eagle Industries receives high marks from clients and employees as they provide on-time and customer focused service. The values of a small New England business combined with the flexibility to change with the times ensures that Eagle Industries is a great partner as they meet the needs of their customers with pride and high-level performance.

This Virtek, II Laser QC Vision System machine, inspects flat and formed parts on the spot, completing scans in just seconds and comparing every measurement to CAD specifications. Also reverse engineering is a breeze as the scanning process captures the complete profile of existing parts or templates at laser speed and stores the data in CAD-compatible files.

PRESS RELEASE

ADF Downdraft Tables and Downdraft Booths are rugged, efficient easy to use industrial air filtration systems for a variety of applications such as grinding, welding, sanding, and polishing. These tables deliver high performance dust and contamination collection in one complete system.

Debris, contamination and fumes are drawn down an through the table grate away from the operator. The air is then filtered through cleanable, replaceable cartridge filters and the clean air is returned to the shop area. The debris drops into a collection drawer for easy clean out.

Available in a variety of sizes from 24" x 36" up to 36" x 96", these units are available with a variety of options including replaceable cartridges, built in lighting, portability package, steel or fiberglass grates, reverse pulse cartridge cleaning and more. Connect with us on LinkedIn: John Ketcham.

THE GATEWAY CLASSIFIEDS

MACHINE SHOP FOR SALE

Established mid state Connecticut shore line machine shop. 35 years in business with repeating accounts. CNC milling, manual turning and milling support machinery, along with a fully equipped inspection department. Some inventory included \$110,000. Please call 860-614-2252 05

Business Partner Wanted

I have a machine shop and assembly operations with a well-established product line in business over thirty years. I am getting old now, and am looking for someone that I can pass this business on to. Ideal candidate would have a small to medium size shop so we can combine operations to absorb overhead. I have space and extra machine capacity. South Central Connecticut Location. Interested? Contact Schaefer@schaeferco.com 05

SELLING YOUR BUSINESS?

We are an established precision manufacturing company with over 55 years of machining experience and we are seeking to expand our operations. If you are ready to move on to your next act, and your business provides machining or special processes, we're interested in talking with you! Please email us at Straton@straton.com or give us a call at 203-375-4488 06

BUSINESS FOR SALE

THE GATEWAY MAGAZINE. I hate to do it, but at 78 years of age, I have a lot of other things I want to work on. Have been publishing The Gateway for 20 years and there is so much more that could be done here in New England and in other areas of the USA. We haven't put a selling price on the business but would listen to any reasonable offer. Our publication goes to 7,100 companies and readership is estimated at 25,000 readers.

It doesn't require a strong background in machining, but it sure helps if you have the basics.

You also don't need a literary background, but having a strong background in good English and punctuation is quite important.

Having some knowledge in the purchasing occupation needs can be useful. But most of all having knowledge of designing advertisements and creating stories is highly recommended.

It isn't for artistic value as much as it is in how to get readers to find sources they need to do their job!
